DUTCHWEST PLATE STEEL
WOOD STOVES AND INSERT

Dutchwest Plate Steel Wood Stoves and Insert

High Efficiency Wood Stoves

The Dutchwest plate-steel stove line features sturdy construction and a handsomely arched cast iron front door with ceramic glass. Models are available in three sizes and cover a variety of heating ranges, with either classic cast iron legs or steel pedestal with pull out ash drawer.

Efficient Wood Insert

The Dutchwest masonry wood insert comes standard with a brick-lined firebox, blower and faceplate (size 44 1/8" W x 31" H) and is the perfect solution for an inefficient masonry fireplace. Shares some of the features of the Dutchwest stoves – but designed for existing masonry fireplaces.

Shared Features:

- EPA Approved
- Primary and secondary (heated) combustion air reduces emissions and improved efficiency – means more heat with less wood & longer burn times
- Arched cast iron door with ceramic glass front
- Air wash system for cleaner glass
- Ceramic handle
- Ash cast lip (on stoves only)
- Side shields (on stoves) for reduced clearances
- Top air guide for improved heat distribution (on stoves only)
- Limited lifetime warranty
